We know that peoples' homes form the centre of their lives. We're passionate about making these homes a place where families come together to celebrate life's victories and special moments. It's a passion that goes right back to our beginning, in 1993, when the Founders established a door joinery shop in Wanganui – not just because it was a central location, but because they wanted to have a positive effect on the economic circumstances of our workers and their communities.

Today, we have Australia and New Zealand's largest range of doors, and three generations have worked in the family business, where people always come first. Every door we create is meticulously designed and crafted, beautiful, bold and built to last – so you can enjoy a sense of certainty, belonging, and confidence in the security of your family. Your doors can last generations, and make a home that's truly yours.

ALUMINIUM

SLEEK. VERSATILE.

DURABLE.

4POT

This range of architecturally designed front doors are powder coated for low maintenance and are capable of enduring all weather. Their aluminium structure provides stability and strength, offering the best security.

THE RELIABLE, VERSATILE ALUMINIUM DOORS.

- **Thermtek** - thermally enhanced, superior noise barrier. Reduces condensation on door.
- **Strata** - Strong and stable, with clean cut modern designs. Not insulated.
- Many designs are available at 50mm thick and options of increased acoustic properties.
- Very low maintenance.
- Durable in harsh weather conditions.
- Stable, strong and secure.
- Powder coated to the colour of your choice.
- Suitable for dark colours.
- 10 Year warranty for all weather.

THE STRENGTH AND BEAUTY OF ALUMINIUM

- The beautiful powder coat finish is very low maintenance and compliments aluminium window joinery.
- Aluminium doors are durable in situations exposed to harsh weather, and won't move or bow.
- Most designs come in Thermtek or Strata. Thermtek is Parkwood's own technology that enhances the doors thermal properties. This helps to keep the warmth in winter, and the heat out in summer.

COMPOSITE

STRONG.
SECURE.

STYLISH.

FVAR10W PAIR

Welcome to our Duramax collection of composite doors. Duramax doors won't rust, rot, twist or dent. They're designed to withstand the extremes of New Zealand weather conditions.

Available in Smooth or Woodgrain finish

THE PERFECT COMPOSITE CHOICE.

- 10 Year warranty for all weather.
- Better thermal r-rating than aluminium and timber doors.
- Double glazed clear or etchlite (other glass types on request).
- Smooth finish doors come with smooth beads and Woodgrain finish doors come with the woodgrain glazing beads, in bolection mould shape.
- Many designs are available at 50mm thick.

FL - WOODGRAIN FINISH

FHV - SMOOTH FINISH

FV28 - SMOOTH FINISH

CHOOSE A SUPERIOR FINISH

- Choose either a woodgrain or smooth skin to be painted or stained any colour.
- LVL stiles and rails for superior stability.
- Solid fibreglass edges - clean and tidy which can be trimmed or rebated.
- Polyurethane core for high insulation.

Visit our website to see our range of composite doors.

TIMBER

SOLID. CHARACTER.

STYLE.

Premium hand-made doors by skilled craftsmen. All timber hand selected and colour matched. Kiln-dried and moisture tested to stop movement. Made-to-measure.

NATURE AT ITS BEST, WITH ELEGANCE AND QUALITY

- Exterior doors - 41mm thick for additional strength.
- Interior doors - 38mm thick.
- Solid timber for better acoustic rating.
- Can be painted or stained.
- High quality smooth finish.
- Character and style.
- Timber doors ARE for weather protected situations ONLY. Timber doors must have a porch roof of at least 1.2m and be finished in the correct product (not an oil) to be warranted.

CHOOSING THE RIGHT TYPE OF TIMBER

STRENGTH, STYLE AND SUSTAINABILITY

Understanding the many different types of wood and their uses can be very helpful for choosing the best wood for your next project. Parkwood's solid timber doors are made from a range of timbers that are reliable for joinery and sustainably sourced. Suited to weather conditions in Australia and New Zealand, options are priced within everyone's budget –offering colours and grains to suit almost any door design.

WESTERN RED CEDAR

Drawn from beautiful Canadian forests, this product is in hot demand worldwide for its rich, red colour, superior stability and variety of grains and shades. Although still a favourite of timber joinery, it is now a premium timber and this is reflected in the price.

EMBERWOOD

Stability. Resistance. Durability. A timber that will never move. With chocolate-brown depths and even grain, this exciting new brand is a breakthrough for the timber world. It is thermally modified in specialist computer-monitored kilns, so the individual pores of the timber no longer absorb moisture, meaning it will not change like other natural products.

ROSEWOOD

A hardwood that is reliable for joinery, it ranges in darker colours from yellow-brown to gold and red-brown. It has remarkable physical beauty and an amazing range of uses and durability, matched only by timbers which are more expensive or do not possess the same physical attraction or working qualities.

AMERICAN WHITE ASH

This light-coloured hardwood that is close to American White Oak, has creamy white to light-brown heartwood with white-coloured sapwood, with uniform texture. Beautiful grain and versatility bring the much-sought-after natural charm of timber to many high-end residential and commercial projects.

RADIATA PINE

Parkwood uses pine that is precision sawn and kiln dried, and then dressed on all four sides. The result is a dimensionally stable, clear wood product. The trees from which Clears are made are carefully selected, managed and processed to achieve a product that is reliable and strong, with high visual and aesthetic appeal. (For oversize doors, Emberwood is recommended for stability).
